I. DESCRIPTION OF THE MAIN BUSINESS OF THE COMPANY DURING THE REPORTING PERIOD

S e S , « ® ! ô 8 ‹ 1 - ü

The Company is driven by two business lines of "public utilities and financial investment", which constitute the main sources of profits of the Company. In particular, public utility includes (1) gas and energy, (2) environment and logistics; and financial investment businesses includes (1) financial leasing and asset management, and (2) venture capital and investment. During the Reporting Period, there was no material change in the Company's principal business.

(I) Analysis of the Principal Business and Principal Business Model

€ S • ô 8 ¿ ô ¾ | Ì ¿ ±

1. Gas and Energy

1. ÷ • U

The Company's city gas business operations mainly concentrate in Yangtze River Delta region, where subsidiaries Shanghai Dazhong Gas and Nantong Dazhong Gas are the sole pipelined gas suppliers in south of Puxi, Shanghai and Nantong, Jiangsu respectively, enjoying considerable influence in Shanghai and Yangtze River Delta region. The Company is mainly engaged in city gas business which is on the downstream demand side of natural gas, including gas supply to residential and non-residential customers, with main scope of business including gas sales, gas installation engineering services and gas-related extended services. Its business model involves procuring gas from the upstream suppliers, selling the gas to end users via self-built urban pipeline network, and also providing relevant transmission and distribution services. The principal gas supply settlement counterparty in Shanghai is Shanghai Gas Co., Ltd, while outside Shanghai, those are primarily PetroChina and Sinopec. Meanwhile, the Company steadily expanded relevant businesses such as energy trade, integrated energy management and electrification surrounding its main business, continuously enriching its city energy business portfolio.

2. Environment and Logistics

The Company is mainly engaged in sewage treatment and infrastructure investment and operations in the environmental and municipal fields. The sewage treatment business covers the investment, construction and operation of city domestic sewage and industrial sewage treatment plants, operated by two subsidiaries of the Company, i.e. Dazhong Jiading Sewage and Jiangsu Dazhong. The business model of the Company's sewage treatment business is to conduct physical, chemical and biochemical treatment of various types of sewage collected through the urban sewage pipe network, followed by discharge into the receiving water bodies after meeting the appropriate national and local discharge standards; in accordance with the Concession Agreement, the local governments make regular payments after determining treated water volumes and unit prices of settlement. Currently, the Company operates 9 sewage treatment plants in Shanghai and Jiangsu with a total capacity of 465,000 tons per day, in which Dazhong Jiading Sewage treats 200,000 tons of urban sewage per day, and the discharge standards have reached the class A+ of Shanghai's highest level; Jiangsu Dazhong conducts operation in four districts of Xuzhou city and Donghai county of Lianyungang, with a total treatment capacity of 265,000 tons per day, while relevant projects keep pursuing compliance with higher standards and upgrading according to local requirements for improvement in discharge standards.

The core operating entity of the Company's logistics business is Dazhong Logistics, a modern service company providing comprehensive solutions for freight transportation, licensed to transport hazardous goods in Shanghai, capable to transport Class II flammable gas, Class III flammable liquids and Class IX miscellaneous hazardous substances and articles, and functioning as the largest third-party specialized LPG distributor in Shanghai that provides important addition to the Company's pipelined gas sales. Dazhong Green Mobility, a subsidiary engaged in investing in, building and operating charging infrastructure of new energy vehicles encompassing its new energy business portfolio, now has 6 charging stations in operation and provides charging services to local new energy vehicle users.

(II) Regional Industry Advantage

€ Z • 8 9 Ì ´ Ð

The Company's gas and environmental business enjoy strong advantages in deep local involvement and stable operating foundation. In terms of gas business, Shanghai Dazhong Gas provides gas supply services covering seven administrative regions west of the Huangpu River and south of the Suzhou River in Shanghai. Nantong Dazhong Gas mainly undertakes the construction of gas pipelines, urban gas transmission and distribution, natural gas sales, and gas appliance sales in Nantong, including Gangzha District, Chongchuan District, Economic and Technological Development Zone, and Sutong Science and Technology Industrial Park etc, focusing on urban areas of Nantong. In the field of sewage treatment, the sewage treatment projects of Dazhong Jiading Sewage and Jiangsu Dazhong are mainly operated in the form of BOT, responsible for regional sewage treatment. The aforesaid business model characteristics have given the Company a relatively stable market scope and specific business term. The natural gas demands and sewage treatment demands in the region provide a continuous and stable market base for the Company's relevant business lines, allowing the Company to gain stable earnings, become more capable to withstand market competition risks and operational fluctuations, and assure robust business operations.

(III) ESG Governance Advantage

€ g • ESG7 # ´ Ð

The Company actively integrates environmental, social and governance (ESG) throughout its business operations and development, pursuing synergistic progression between green development, sound governance and the coordinated advancement of its core businesses. In terms of gas business, the Company actively utilizes clean energy and keeps optimizing the operating efficiencies of its pipeline network; in terms of sewage treatment, the Company keeps increasing its resource utilization efficiencies and levels of environmental management through process optimization and fine management. Building on its ongoing efforts in sound corporate governance, green operations and social responsibility, the Company's sustainability and social recognition have continued to improve. In 2025, the Company's ESG rating was upgraded from A+ to AA-, while it received the highest green enterprise rating of Ge-1.

(IV) Advantage of Continuous Financing Enablement

€ , • 5 ƒ D (• ´ Đ

The Company kept expanding financing channels, maintained AAA credit ratings, and enjoyed desirable corporate credibility, as well as strong financing capabilities and fund pooling capabilities. By making a comprehensive use of diverse financial instruments such as corporate funds, debt financing instruments and asset securitization, the Company has gradually set up an all-round, multi-leveled financing system. The Company kept closely informed of orientation of the macroeconomic policy and changes of financing markets, kept optimizing its ways and structures of financing, balanced its direct and indirect financing arrangements in a coordinated manner, and constantly improved its funds allocation efficiencies and financing assurance capabilities. On the basis of effective control of financing risks and reasonable reduction in comprehensive financing cost, these achievements provided a strong support for improvement in quality and efficiencies and robust development of the Company's main business.

(VII) Potential Risks

€ V • • & Á Y , ˆ

1. Risk of fluctuation in natural gas prices

City gas operators now generally adopt a pricing model of cross subsidizing between non-resident users and resident users, in which gas sales prices at the point of use are determined by the local governments' pricing authorities. As there is a certain cycle in terms of price adjustment by these pricing authorities, price adjustment might be lagging behind market changes. Gas purchase price is highly vulnerable to domestic and overseas market dynamics such that the Company's business performance would be affected if gas source purchase cost increases and the price transmission mechanism doesn't function well. The Company will keep informed of market changes, and actively push government authorities to perfect the price linkage mechanism across upstream and downstream for accelerated cost channeling.

*1. Â Í ø * , ˆ*

2. Risk of changing policies

In recent years, China has been pursuing the policies related to environmental protection and “carbon peak and carbon neutral” by intensifying ongoing supervisory and enforcement efforts, thus posing higher standards for corporate operations management. In the future, possible technology standards upgrading in the industries due to adjustment of environmental protection policies might create certain cost and operating pressures on the Company’s business operations. The Company’s sewage treatment subsidiaries operate in strict accordance with local standards, hold fast to the bottom line of up-to-standard discharge, strictly control quality and cost through centralized procurement practices, while keeping pursuing equipment renewal and process optimization, and improving its environmental management expertise and operating effectiveness.

3. Risk of workplace safety

The gas operation, gas pipeline construction and municipal energy management operations in which the Company

Establishing and maintaining a capable and motivated management and technical team is paramount to the success of the Group. The Group's employees receive remunerations including basic salaries, performance bonus and other employee benefits. The Group also provides social insurance and other benefits to its employees, such as basic pension insurance, basic medical insurance, work injury insurance, unemployment insurance, maternity insurance, housing and personal accident insurance pursuant to China's labor law and the relevant requirements of the national and local governments. Basic pension insurance, basic medical insurance, unemployment insurance and housing funds are contributed by the Group and the employees at a certain proportion in accordance with the relevant local requirements. The work injury insurance and maternity insurance are generally paid by the Group. The Group reviews the performance of its employees annually, and the results are considered in his or her annual salary assessment and promotion appraisal. The Group also provides on-the-job training to its employees from time to time.

IX. USE OF PROCEEDS FROM THE PUBLIC OFFERING

X e ® š ï / Ô { › ° \ Ä

On December 5, 2016, the Company completed its public offering of 478,940,000 H Shares (excluding over-allotment) (comprising 435,400,000 H Shares offered by the Company and 43,540,000 H Shares sold by Shanghai Gas (Group) Co., Ltd. and Wuxi Passenger Transport Co., Ltd. (collectively, the "Selling Shareholders")). The issue price under the public offering was HK$3.60 per H Share. The net proceeds (after deducting the underwriting fees and commissions, transaction levy and trading fees) received by the Company were approximately HK$1,444.5 million. On January 9, 2017, the Company further completed its public offering of 54,703,000 additional H Shares (comprising 49,730,000 new H Shares issued and allotted by the Company and 4,973,000 H Shares sold by the Selling Shareholders) due to the partial exercise of the over-allotment options at the issue price of HK$3.60 per H Share. Additional net proceeds (after deducting the underwriting fees and commissions, transaction levies and trading fees) of approximately HK$175.0 million were received by the Company. Therefore, the total net proceeds received by the Company (after deducting the underwriting fees and commissions, transaction levies and trading fees) were approximately HK$1,619.5 million.
